1245-HZLC91 Poor water quality Waiwiri Stream

This work was in partnership with (and led by) Manaki Taha Moana (a Maori Research group). The research identified a number of issues that are best left in the hands of the community and the Horowhenua District Council rather than for Horizons to implement. However, it has been very useful to provide Horizons with a sense of direction of who to work with, and the issues to be solved.

The work that was presented through the advice grant can be found at:
